Rethink
Traditional PAW

Question!!!

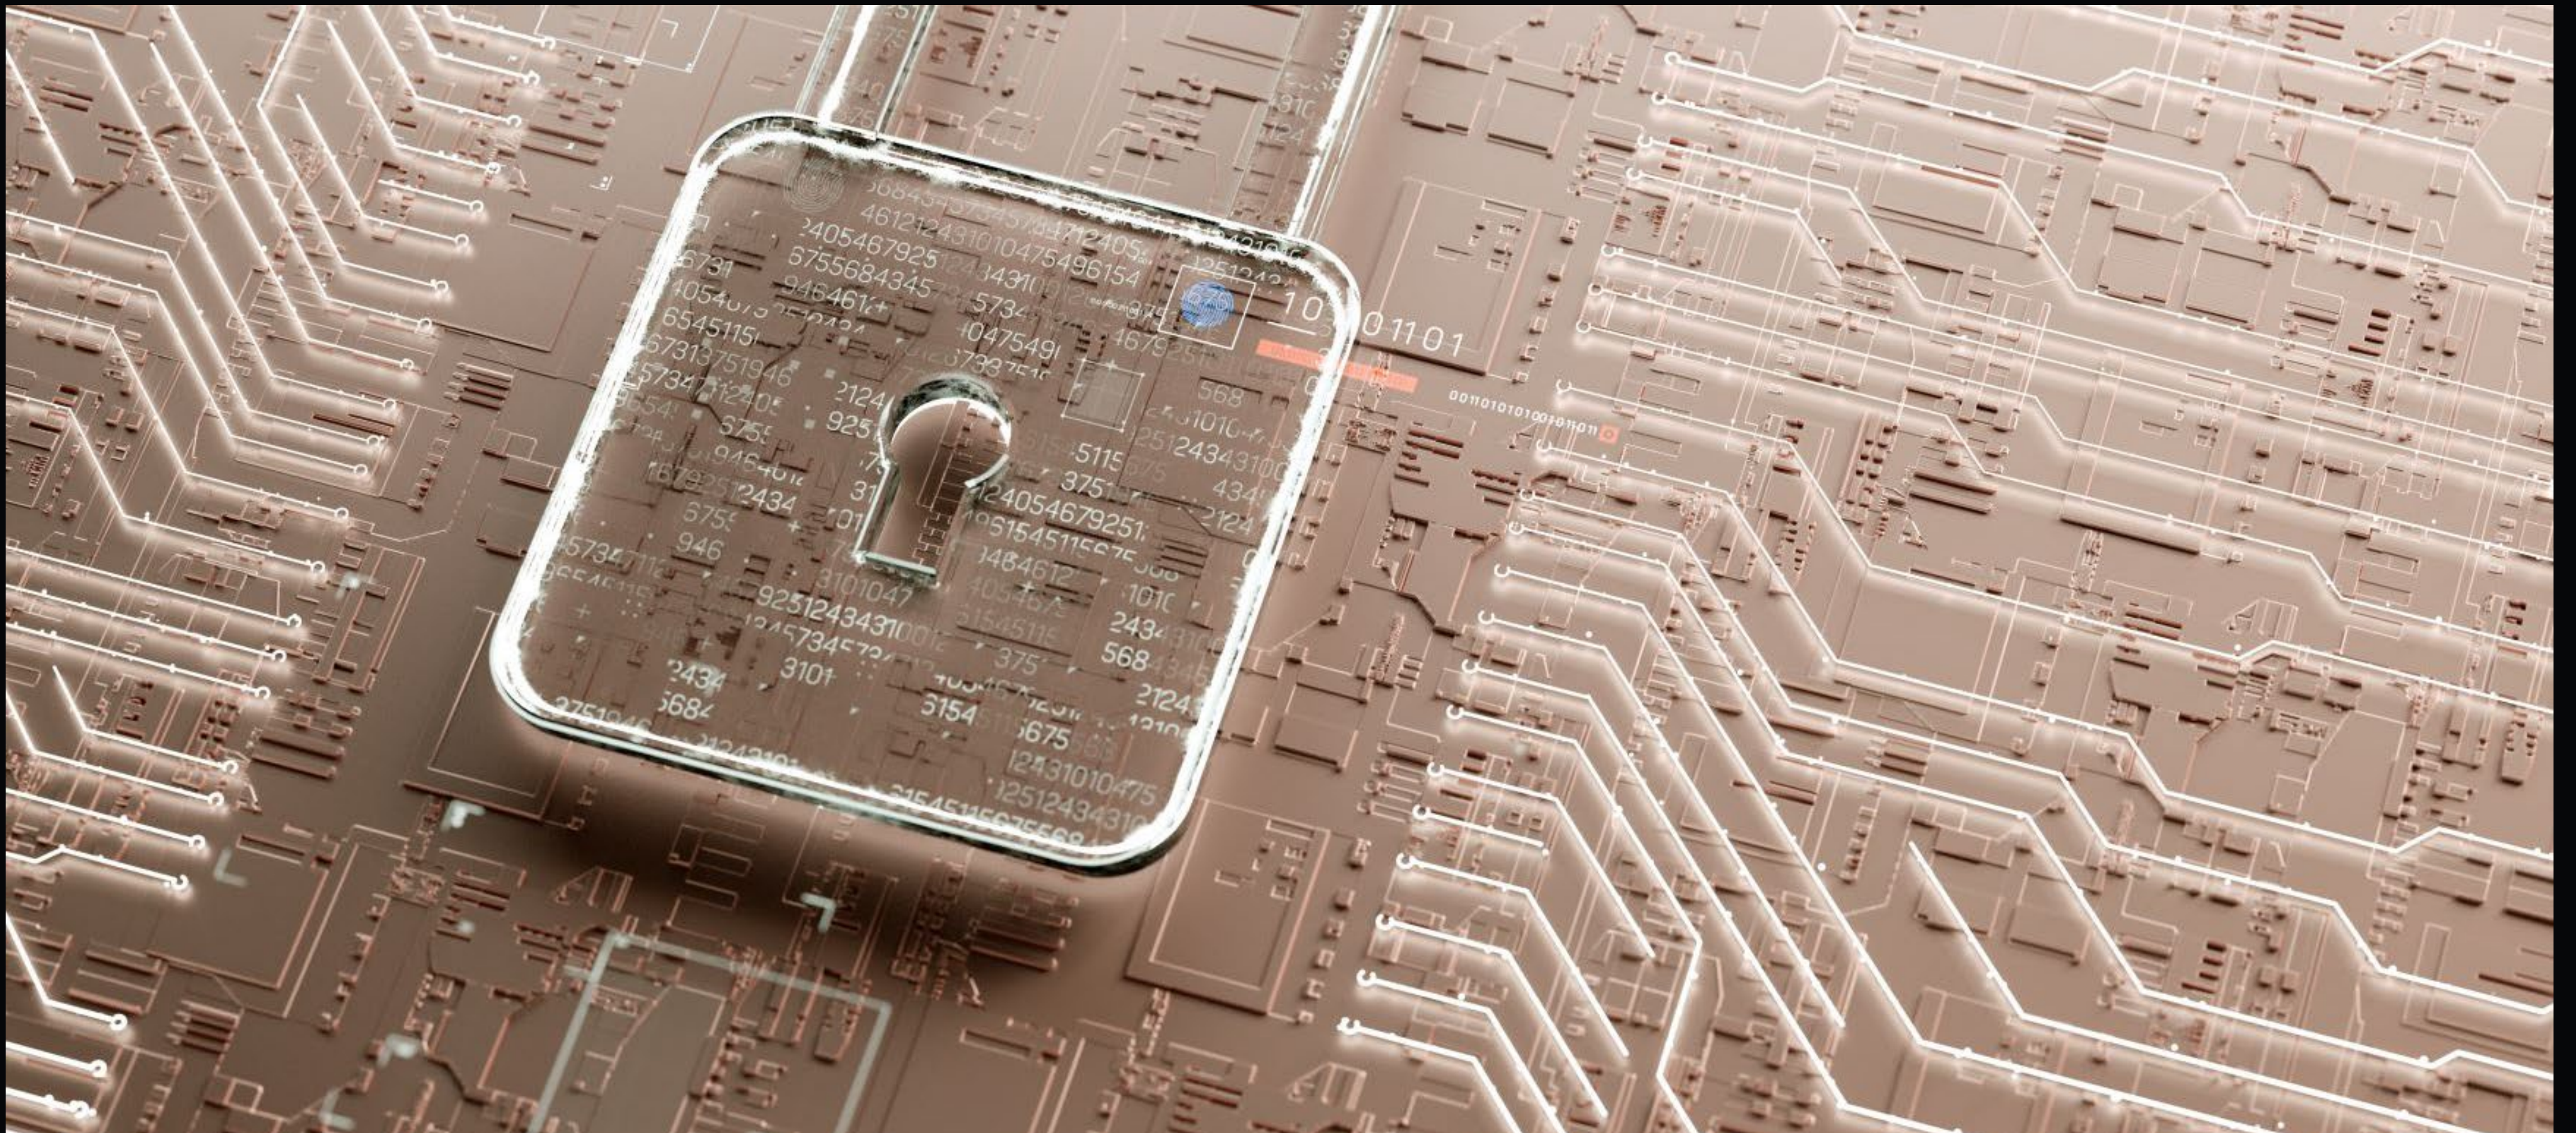

Separate Admin Account

Tiering Model

PAW

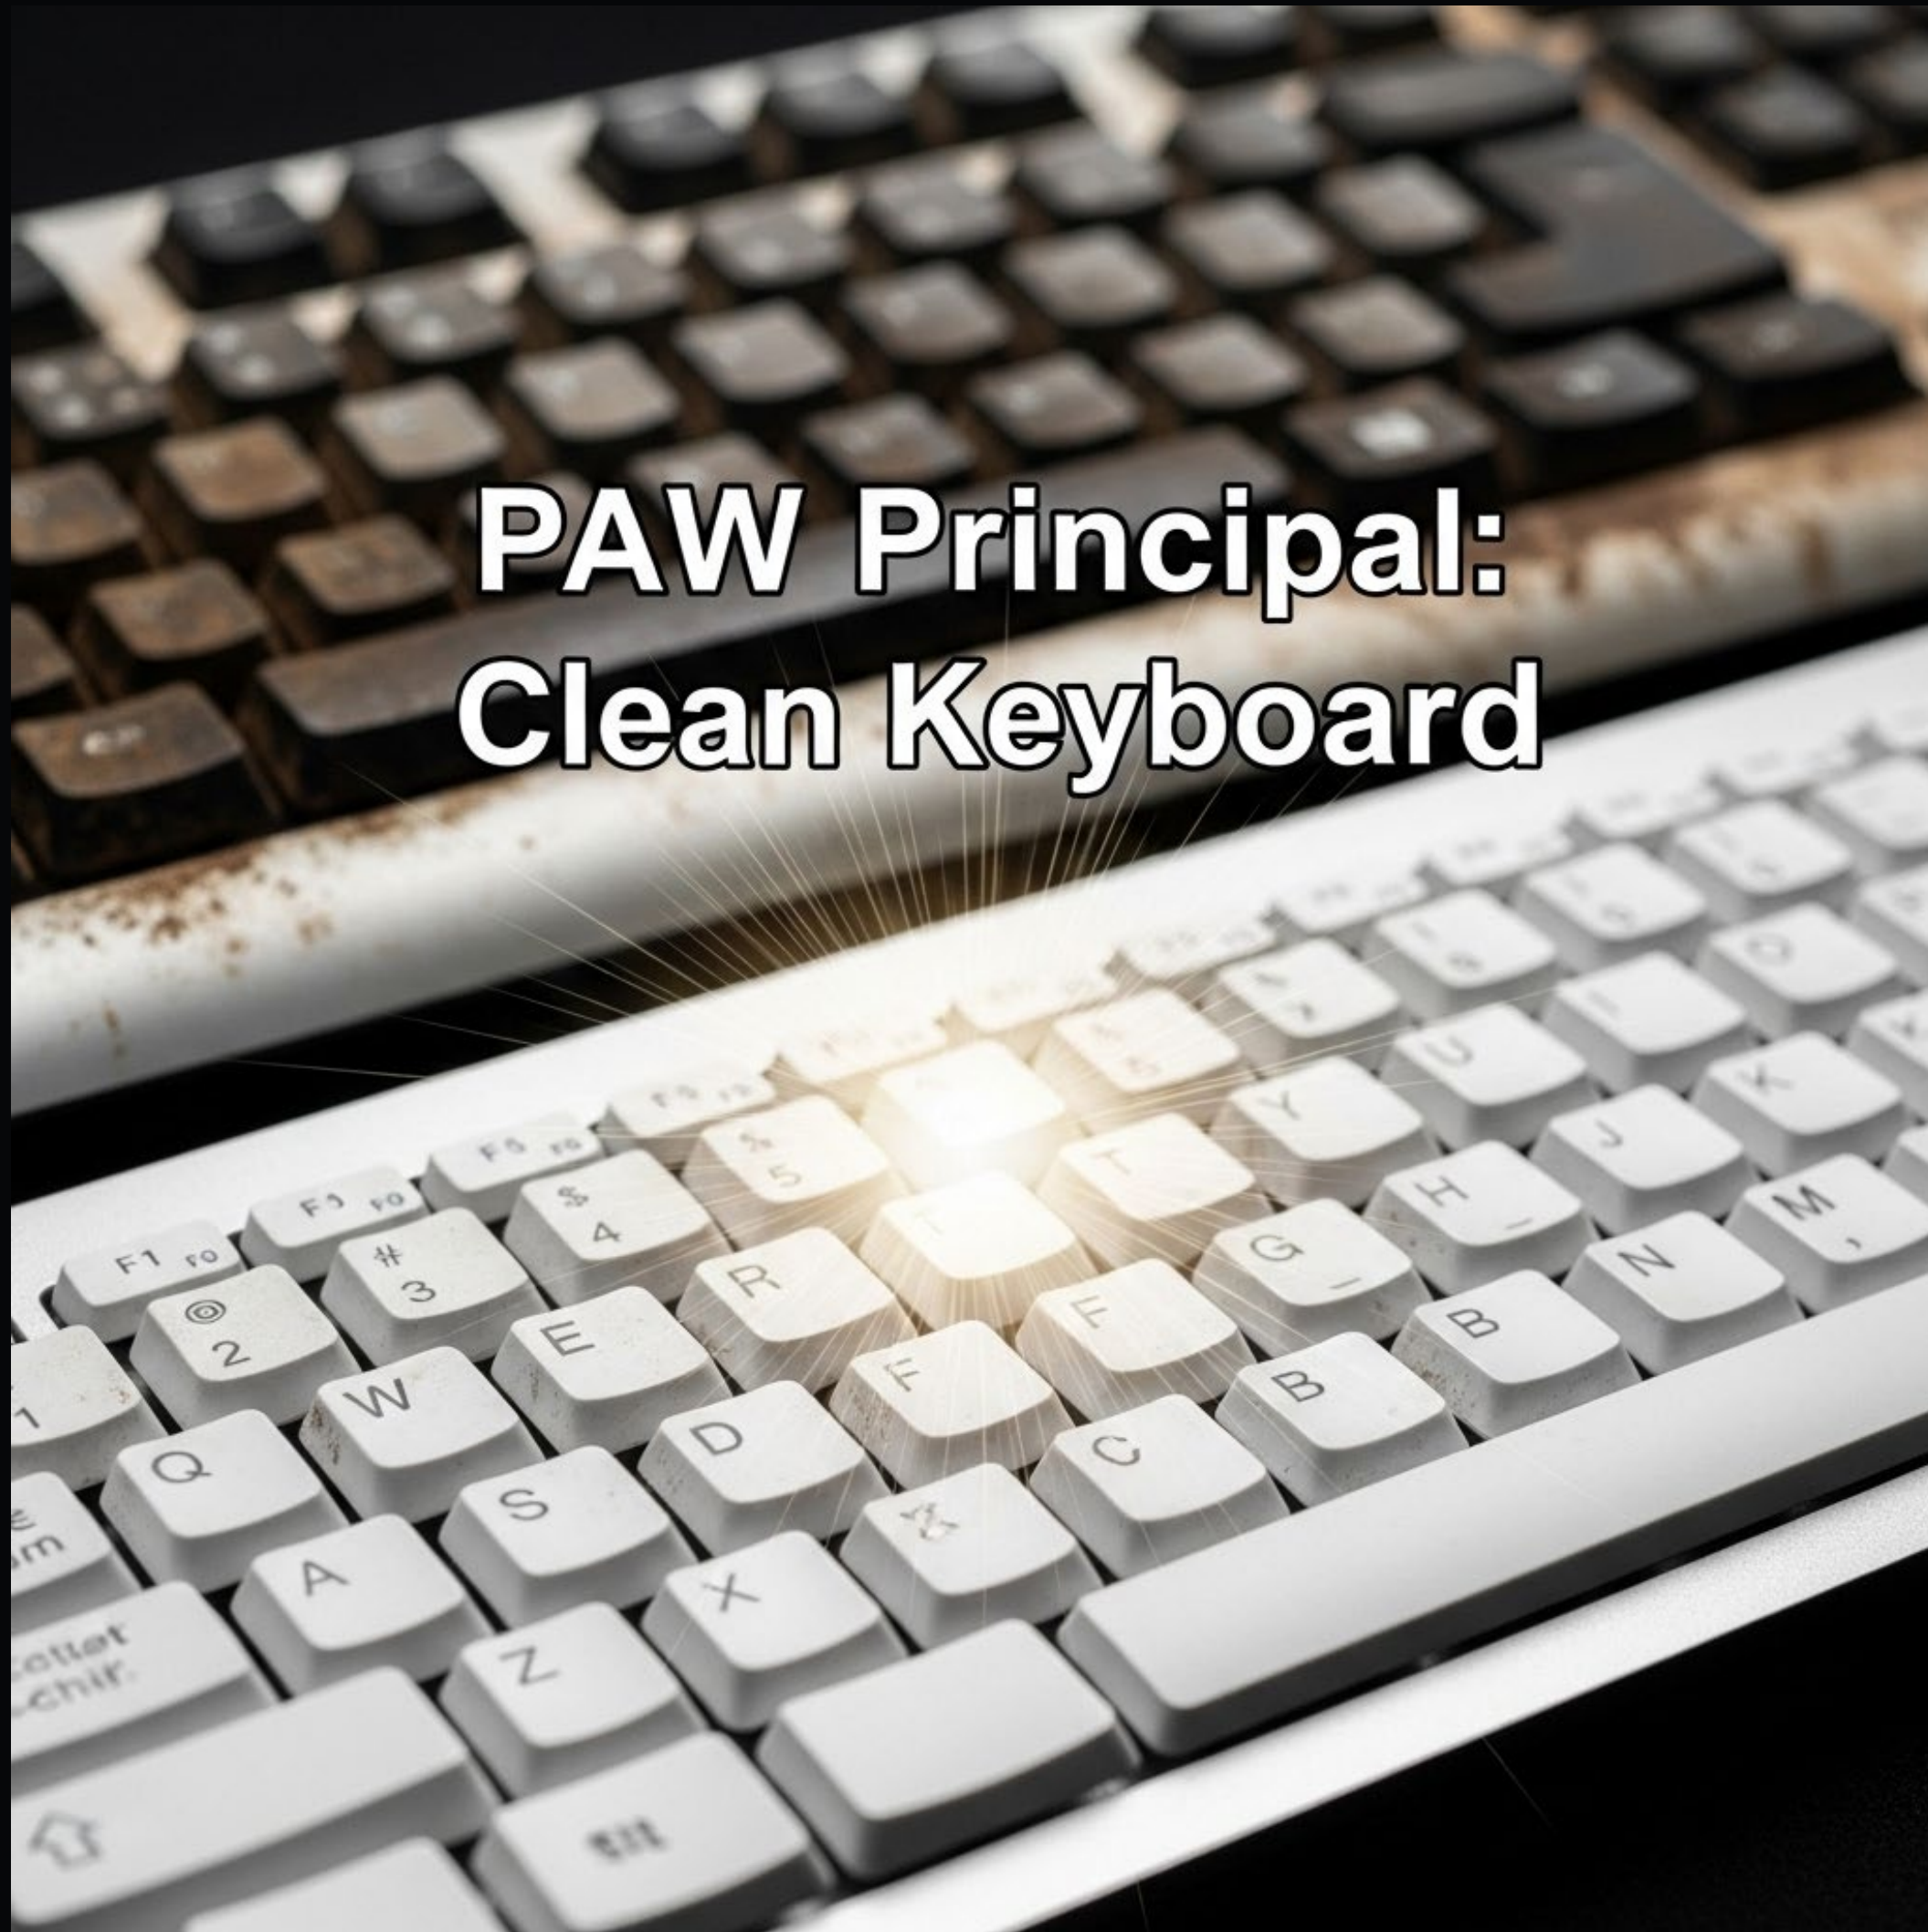

Secure EVERYTHINK

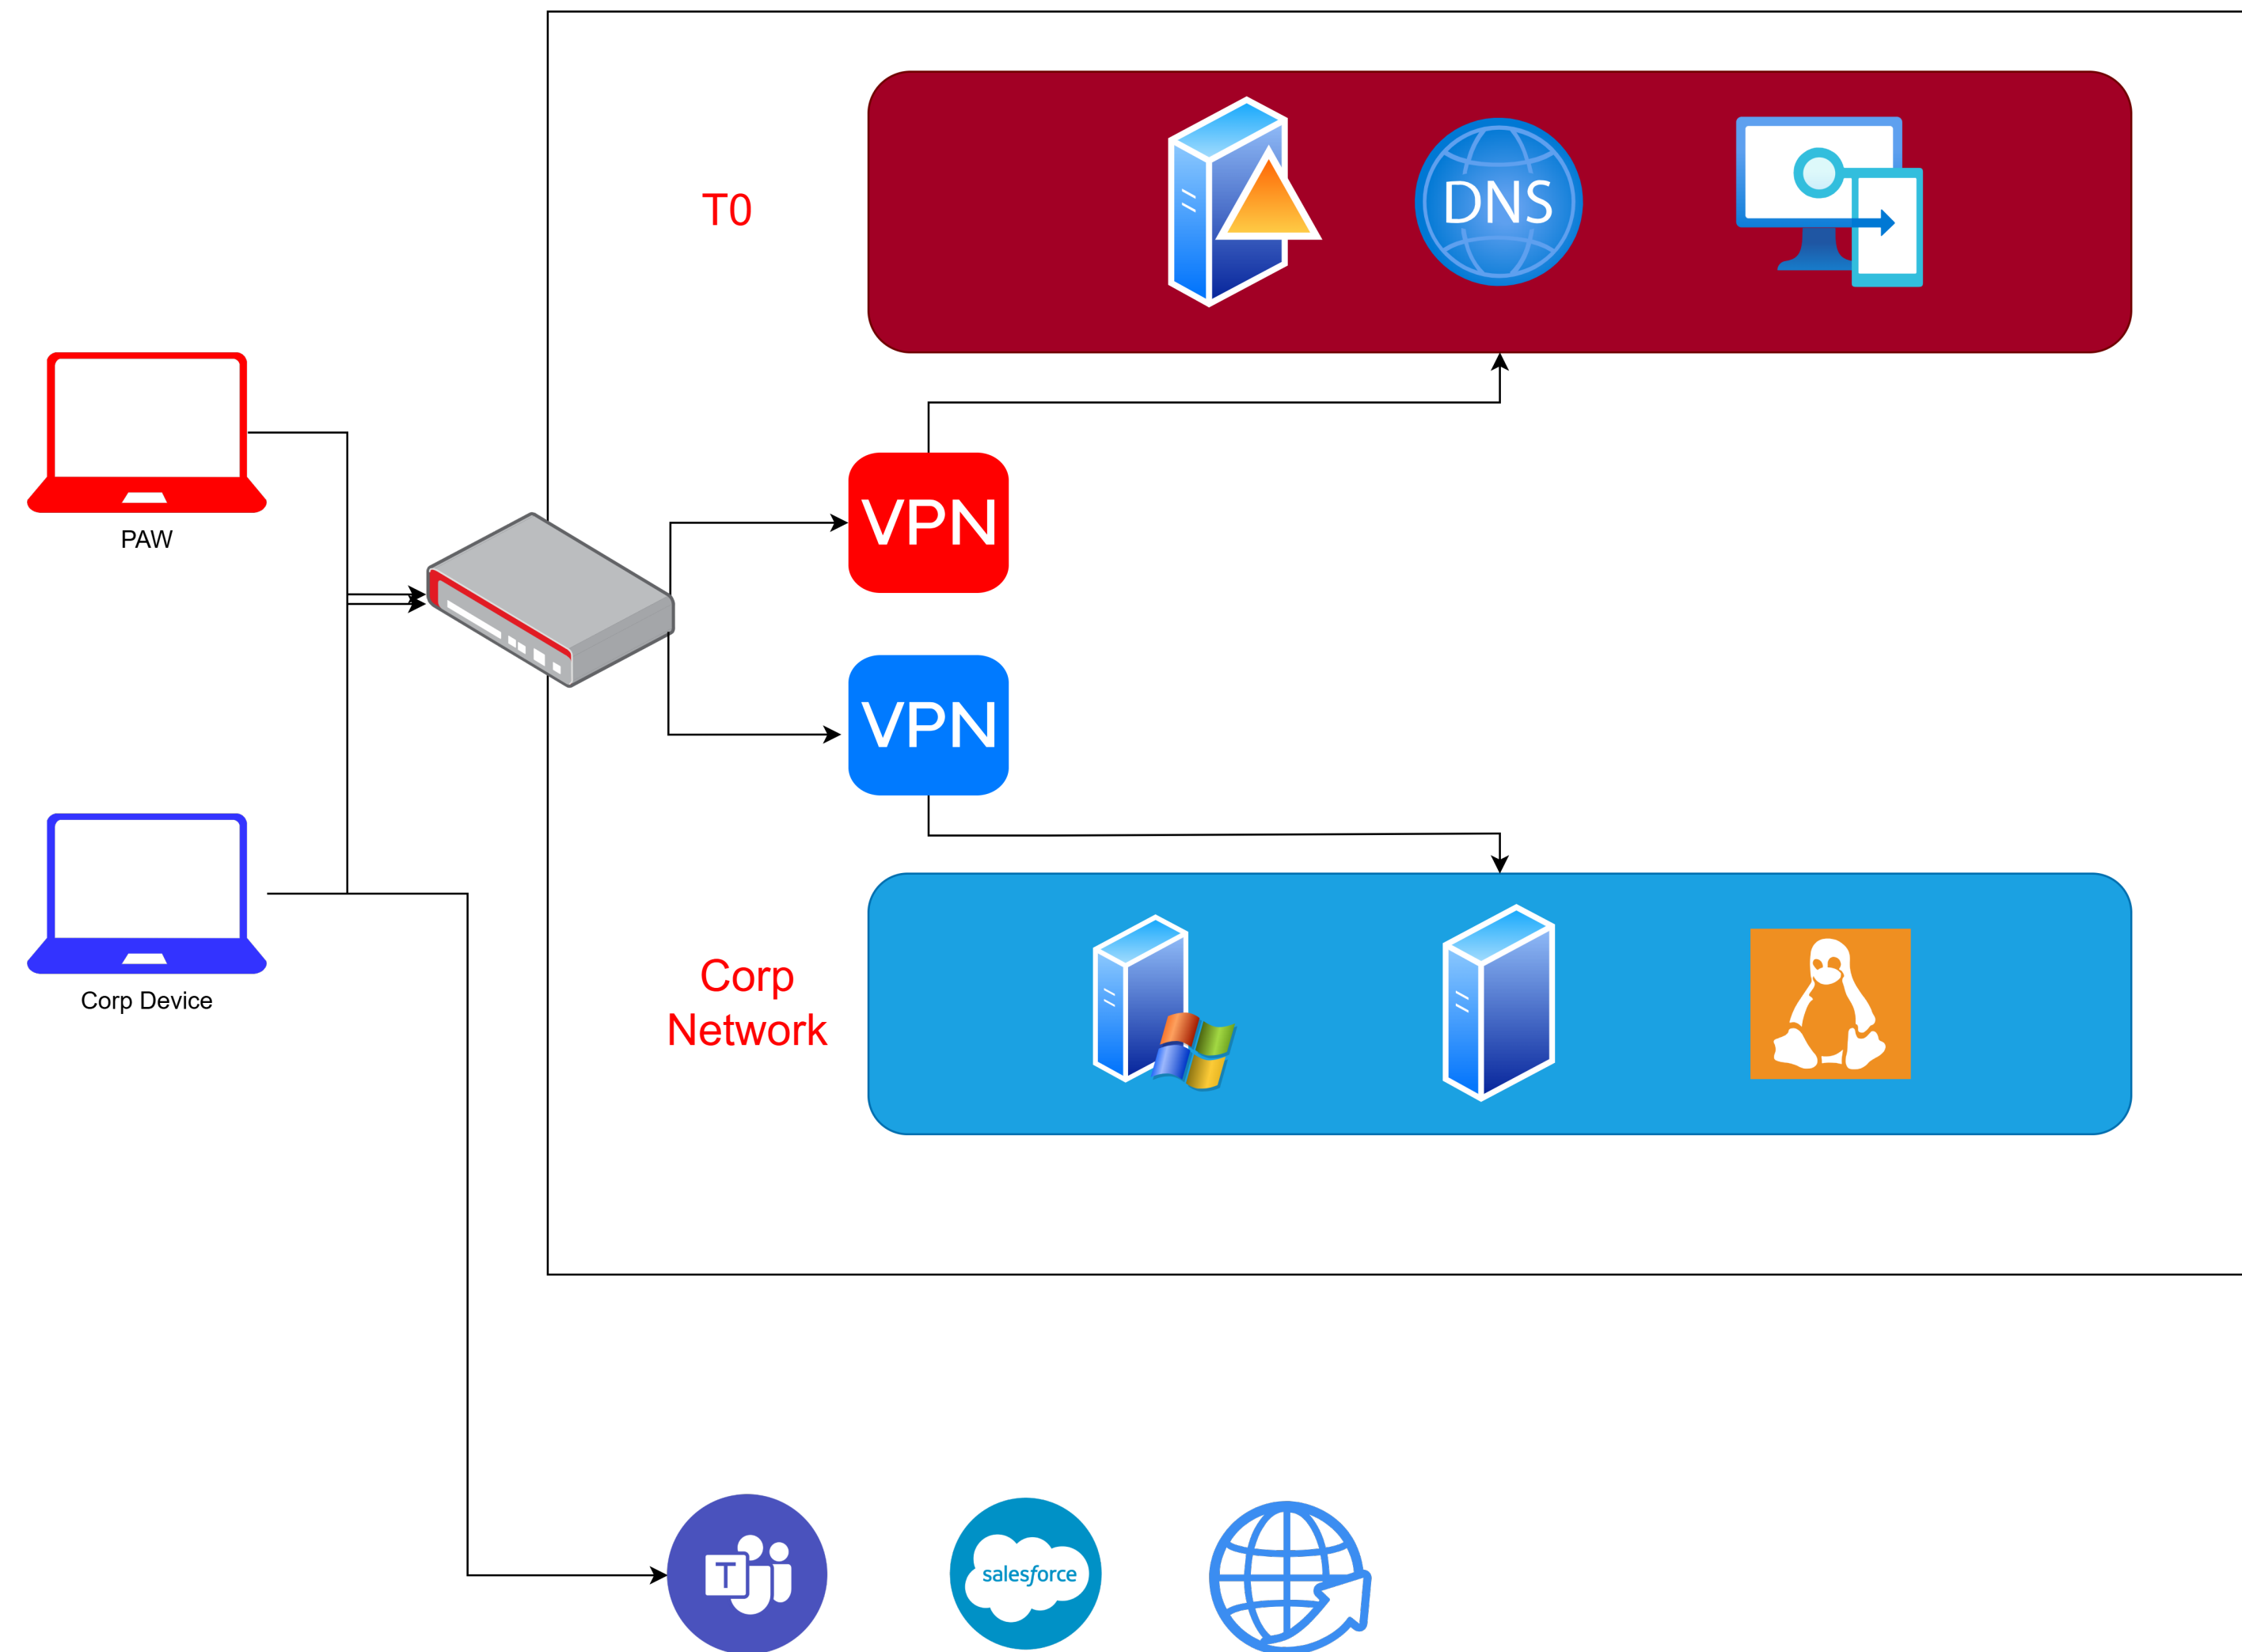

Clean EVERYTHINK

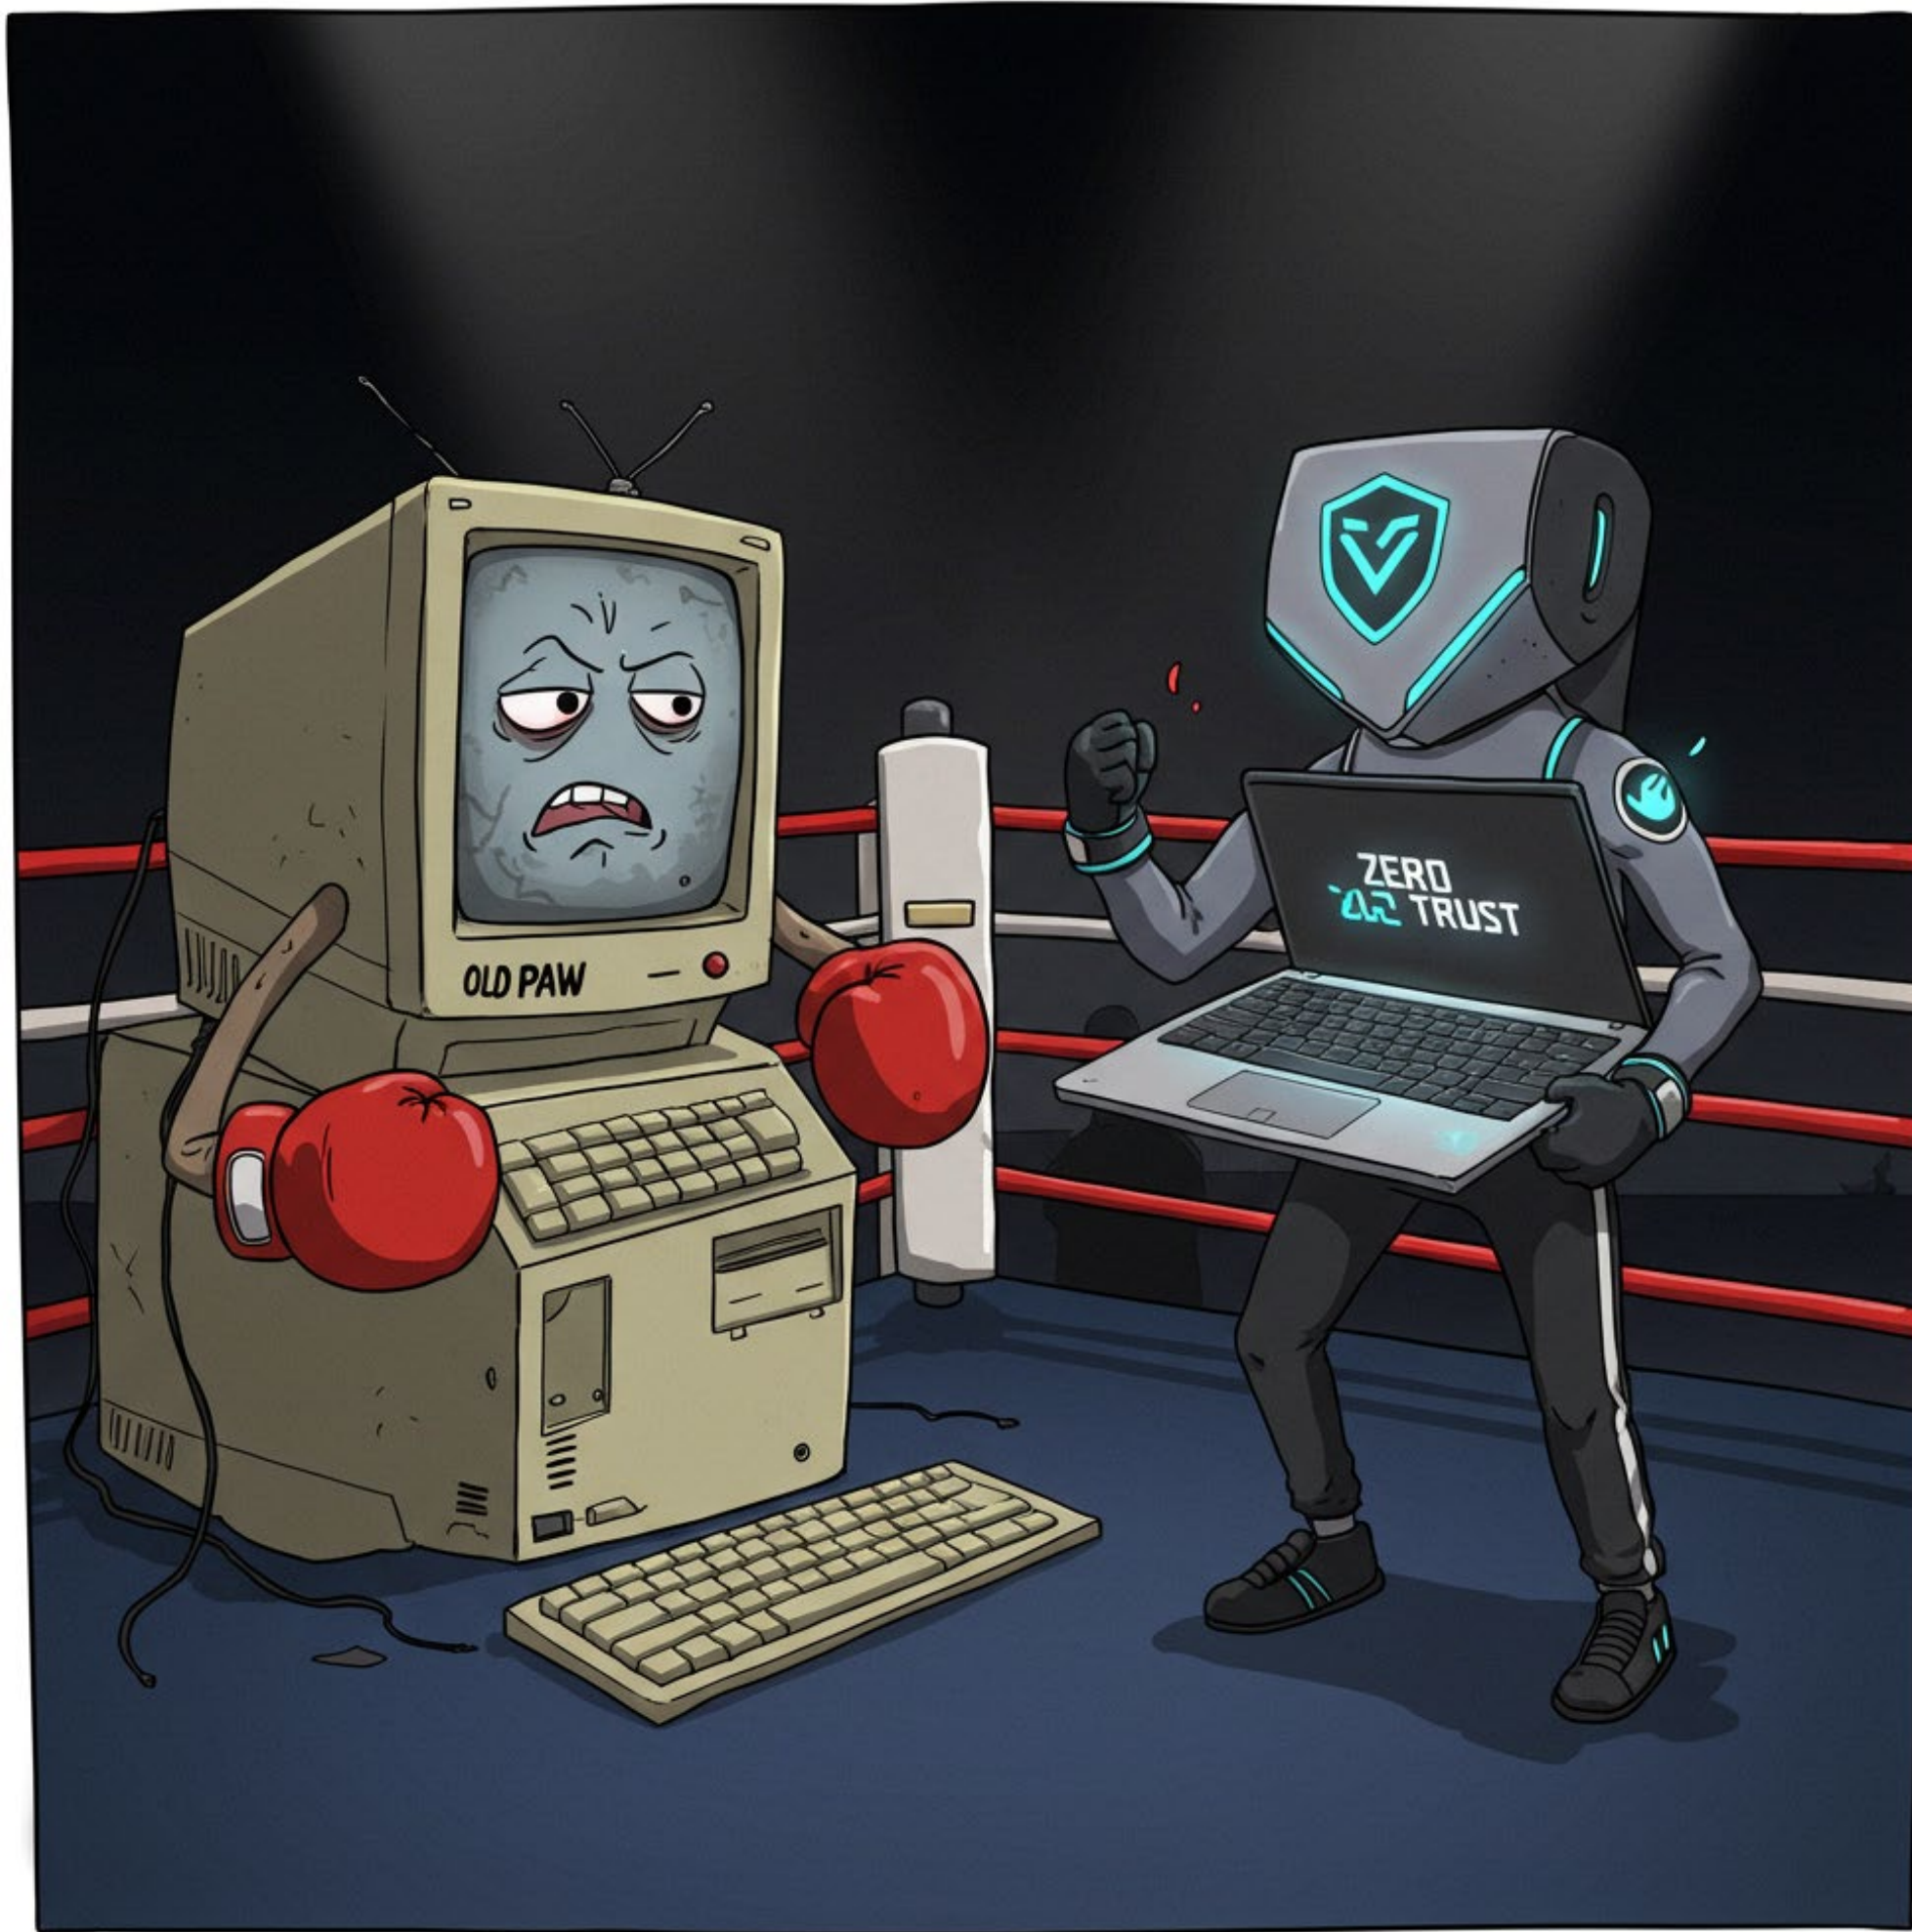

**PAW Principal:
Clean Keyboard**

Architecture

Change it?

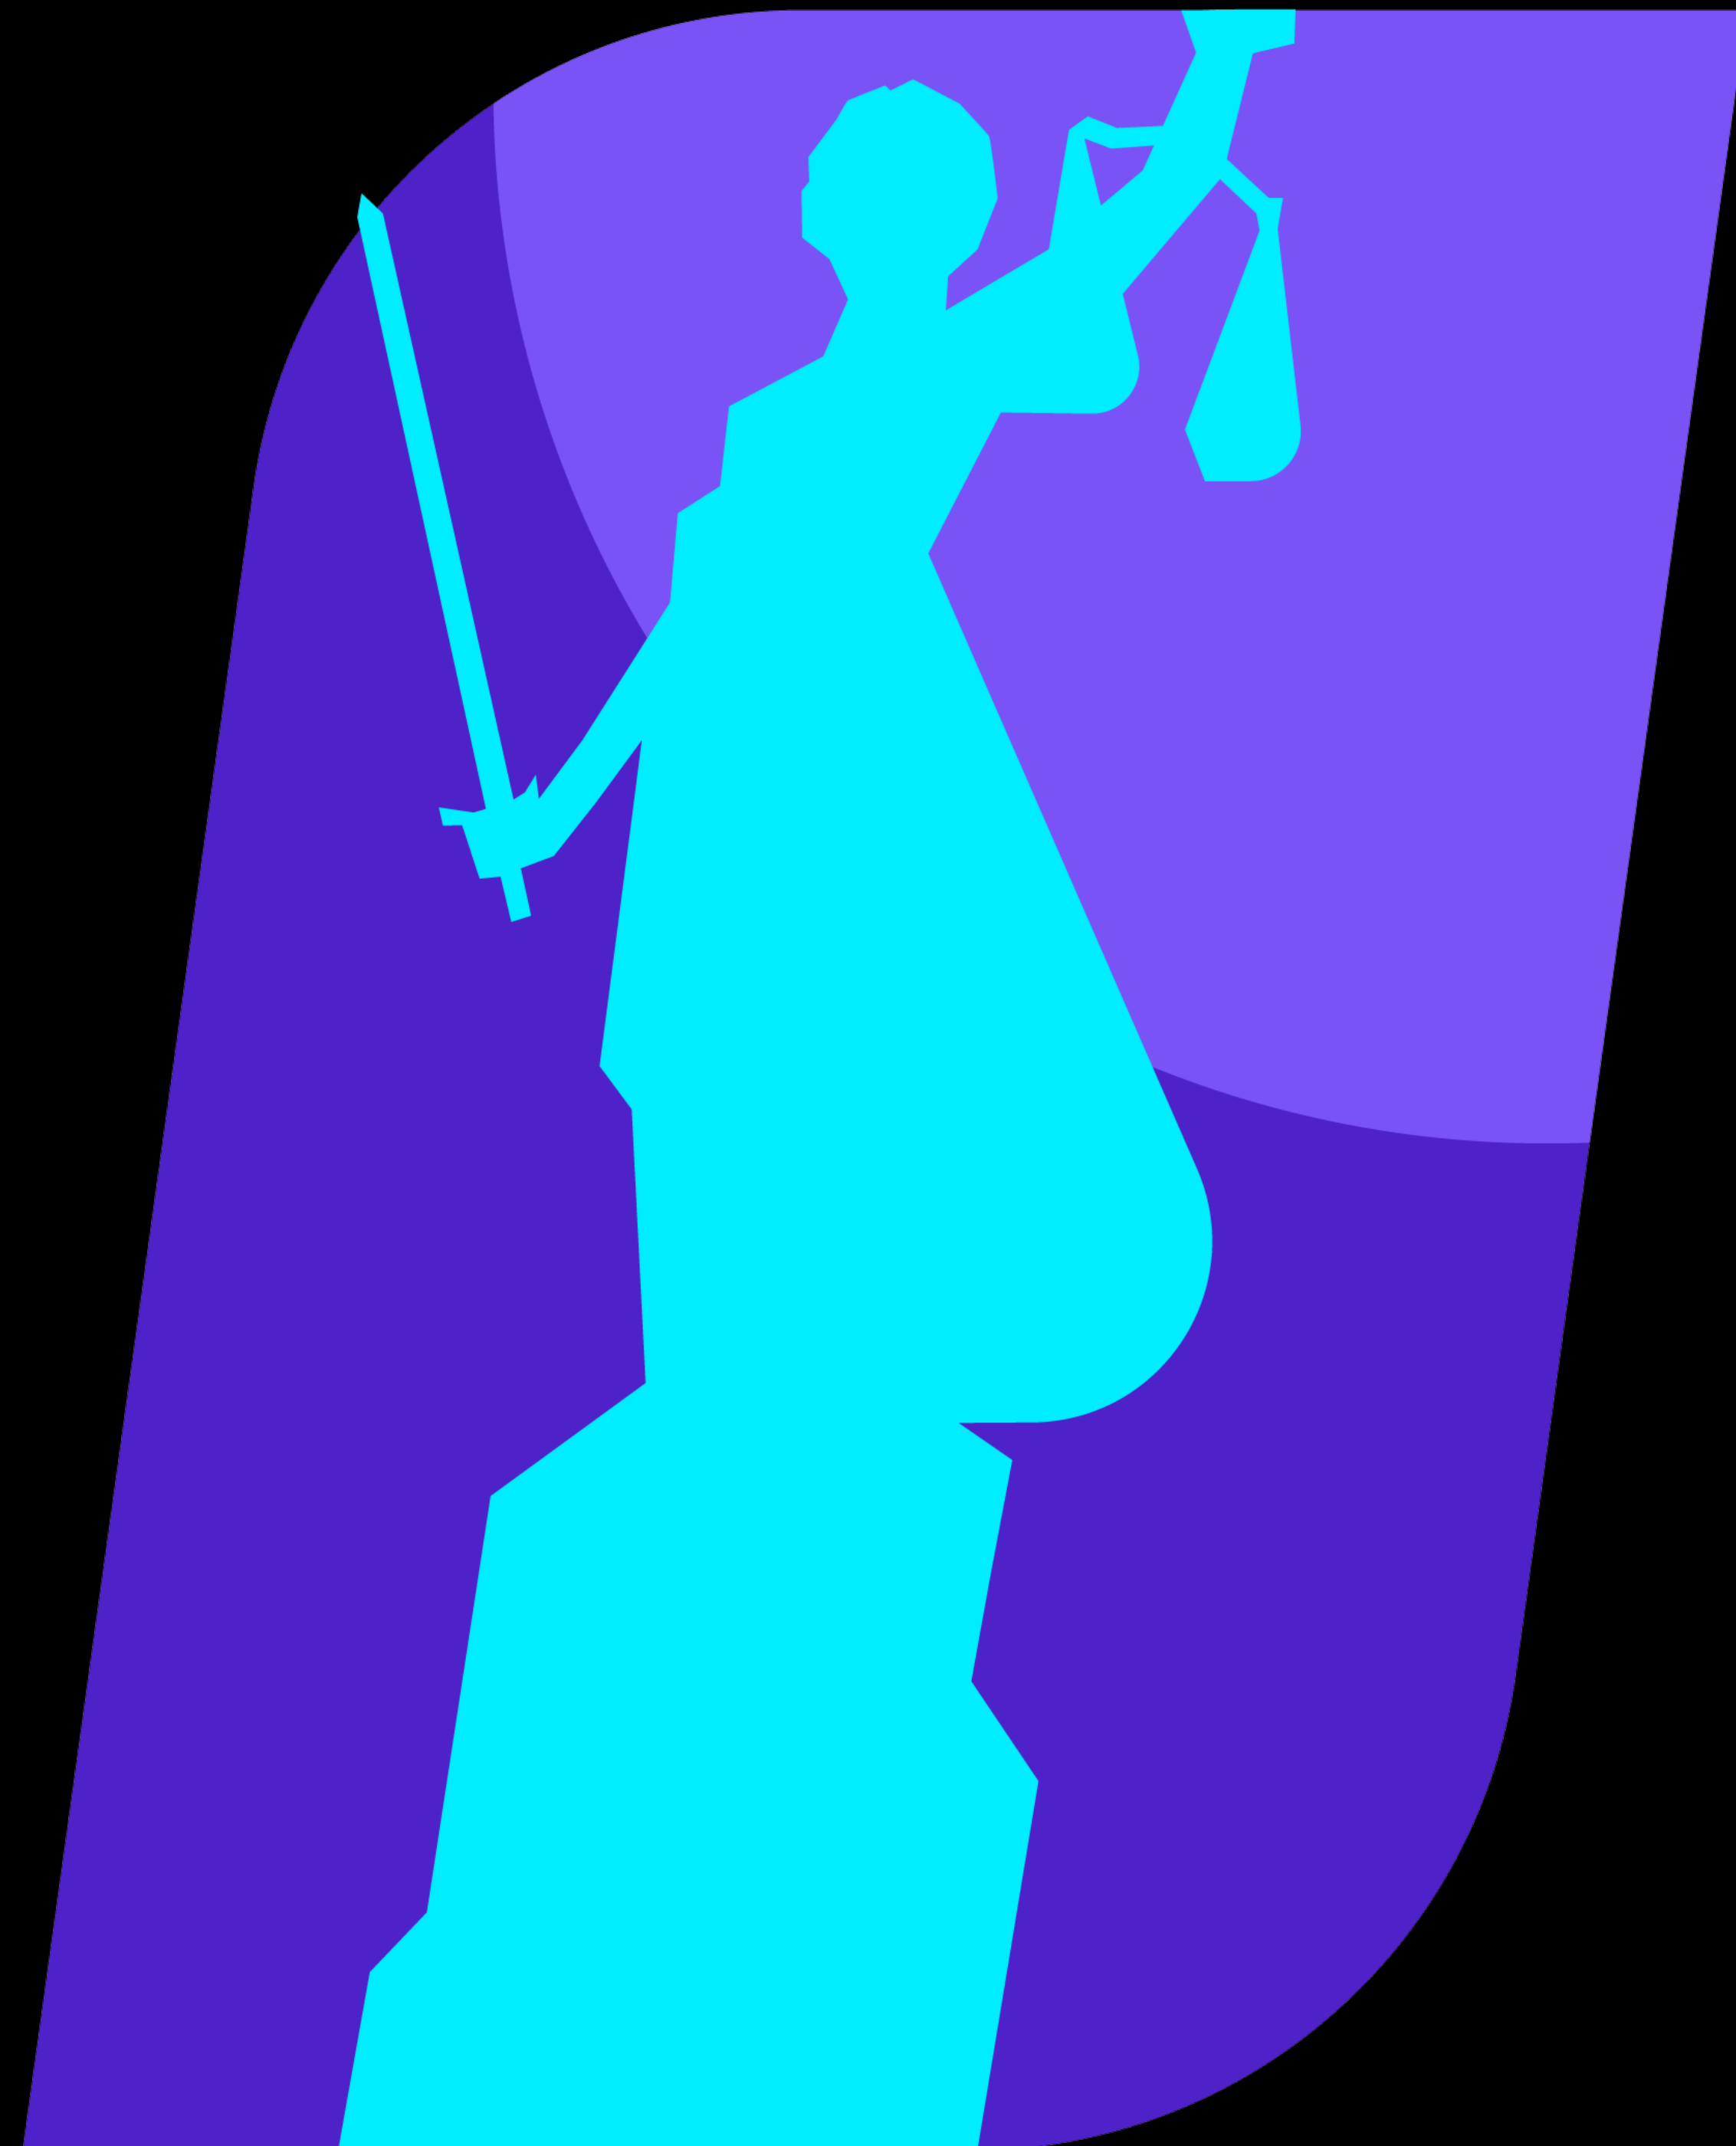

Two Hardware Devices

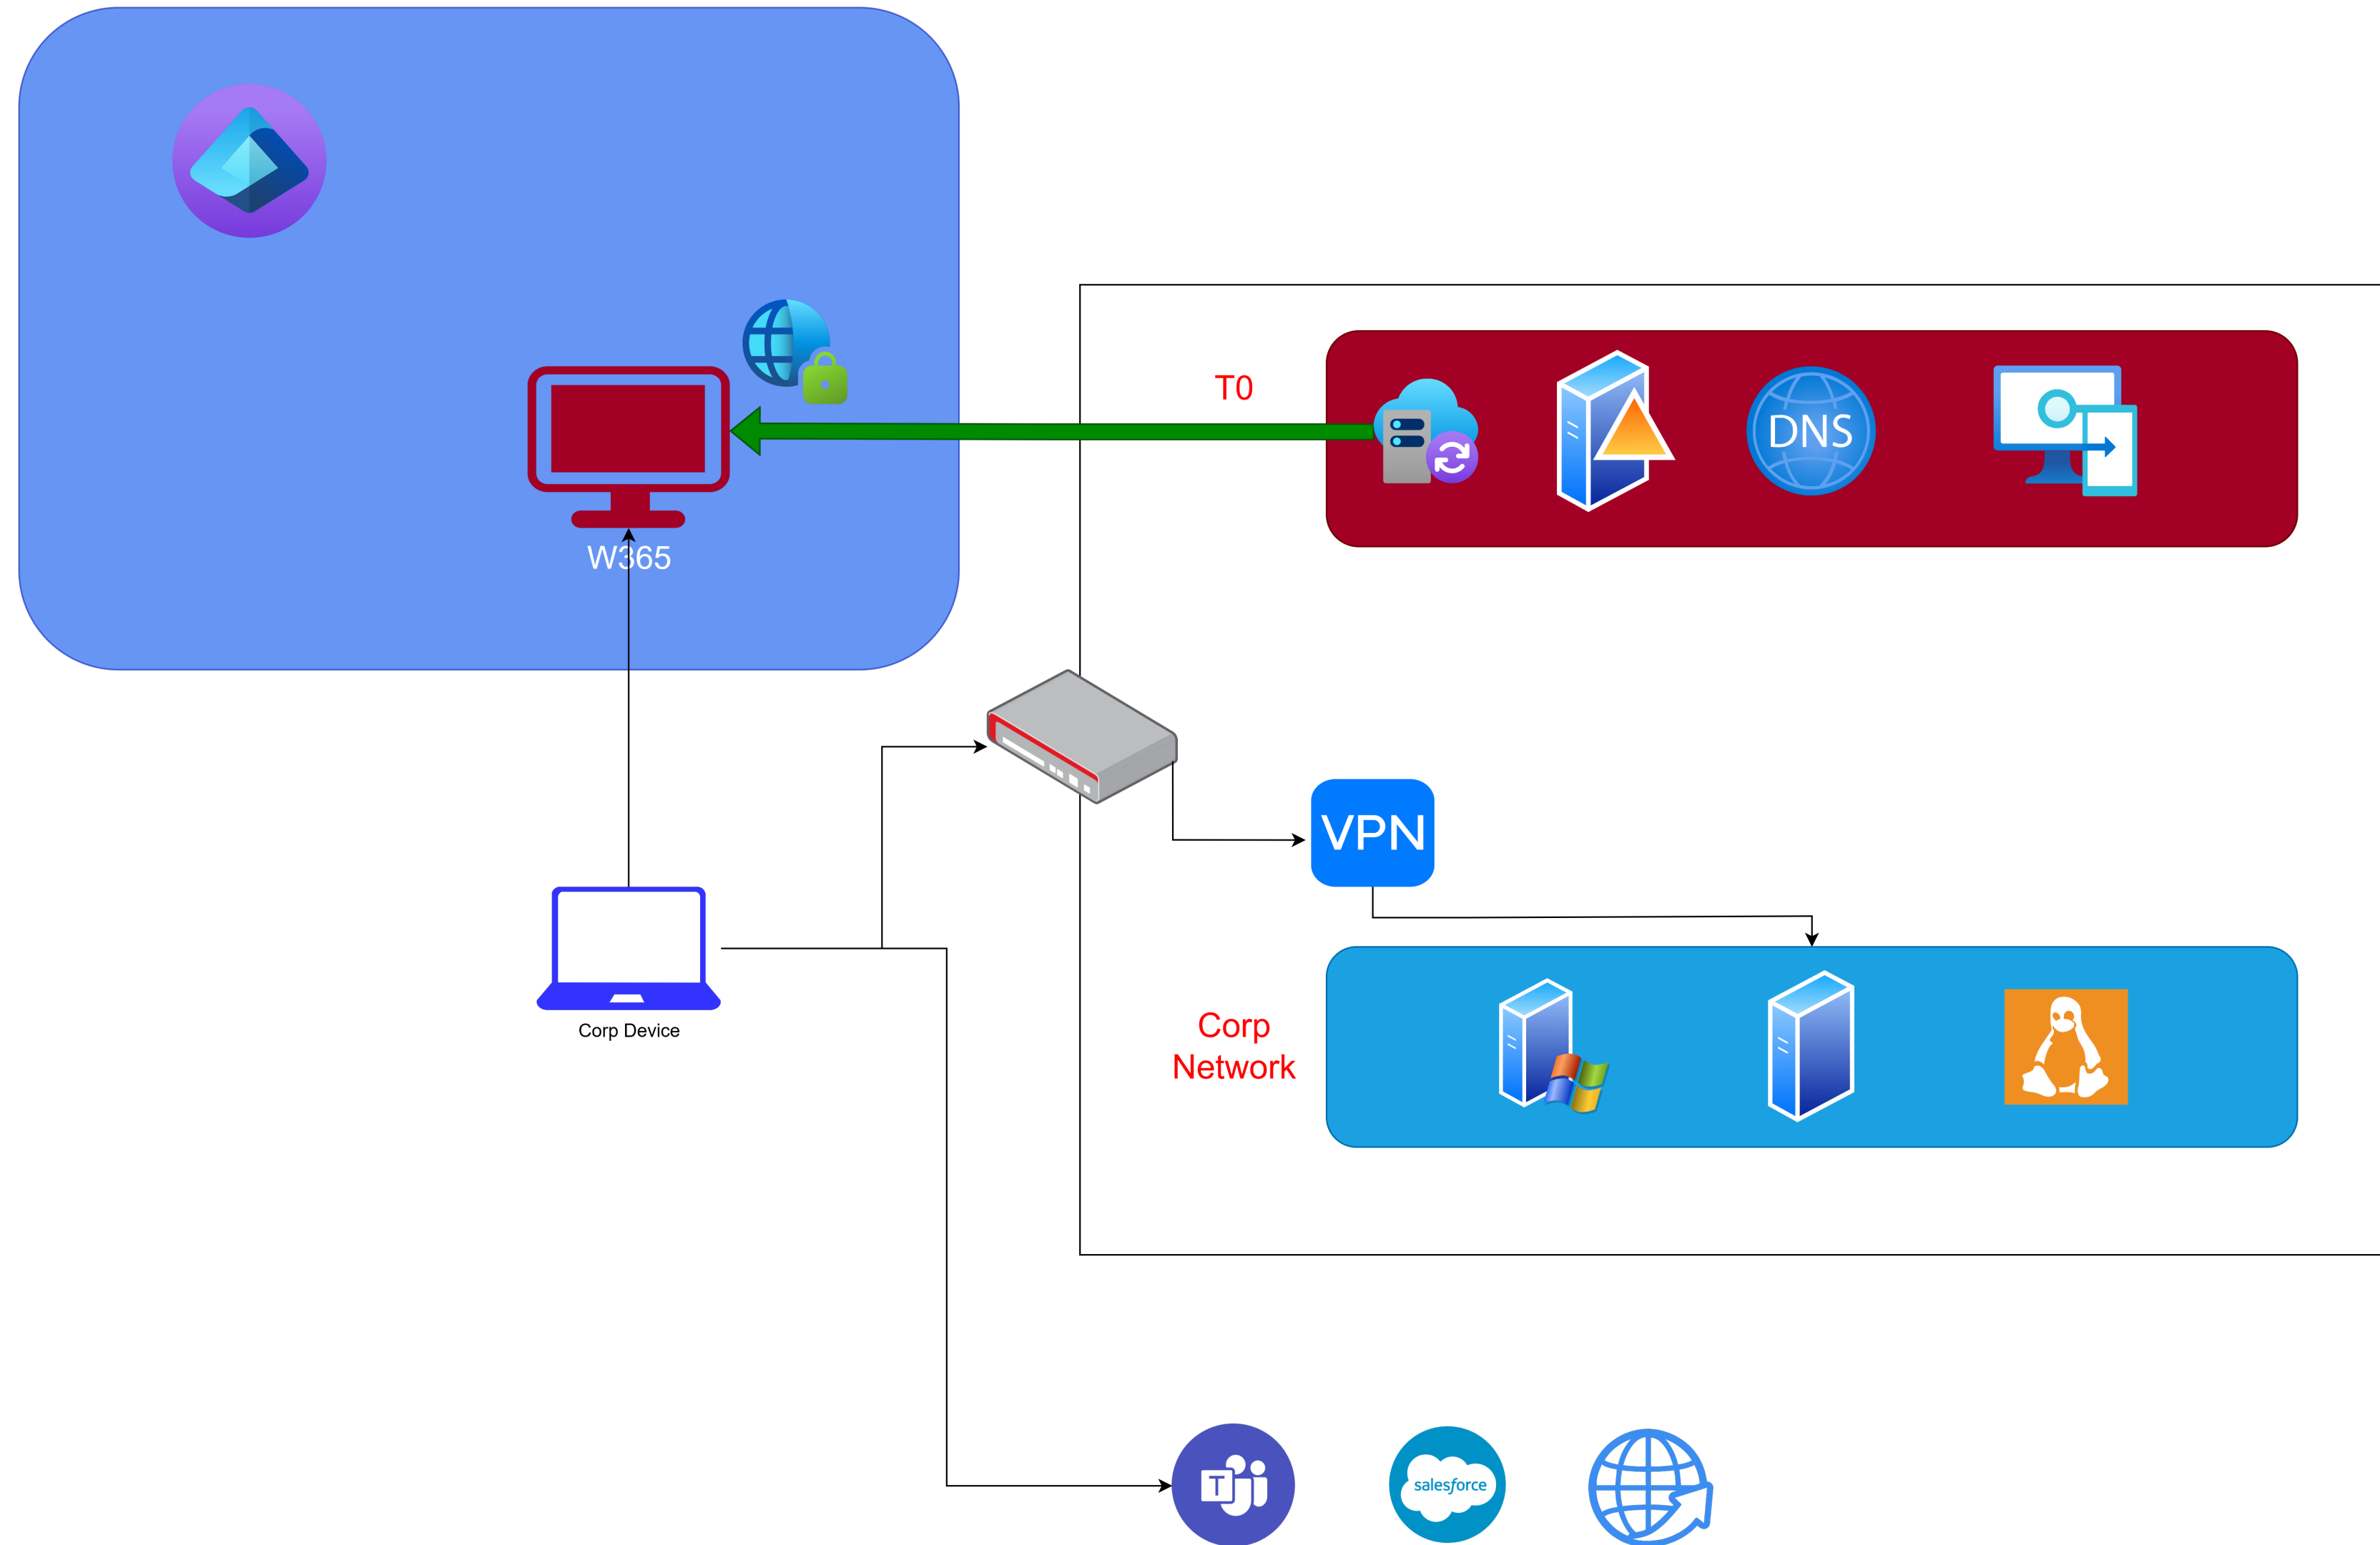

Unflexible

ESAE is deprecated

Same Technic but Modern Infrastructure

Modern Architecture

Decisions over Decisions

Dedicated Hardware

Hardware or Virtual Device

VPN

SSE

ESAE

Zero Trust

Smartcard

Fido

Protect it!

What is a real clean keyboard?

Is it worth? Passkeys? Process?
Windows Hello Keyboard got hacked?

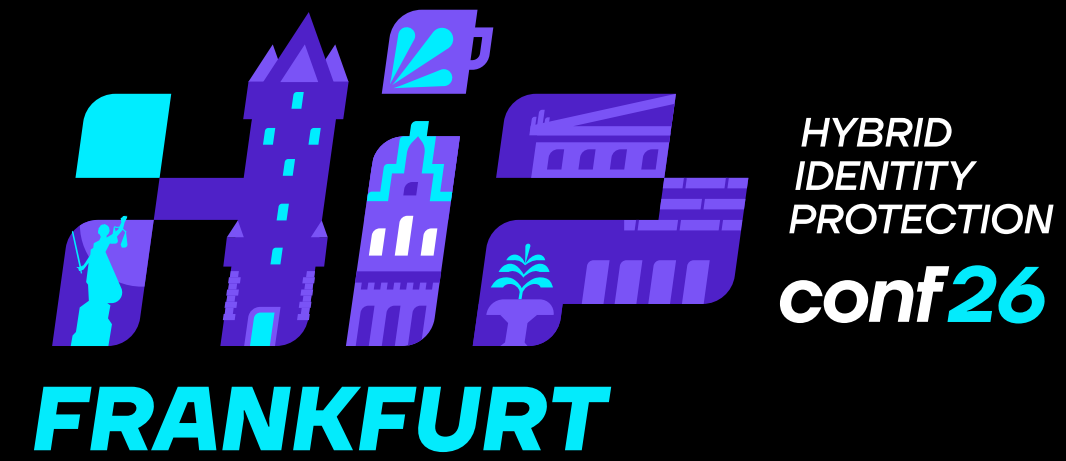

Demo Time

Takeaways

- 01 Moder PAW is possible
- 02 Fido over Smartcard
- 03 Compliant vs 2nd Device
- 04 Clean Keyboard???
- 05 Flexibility
- 06 Zero Trust
